## Snippets

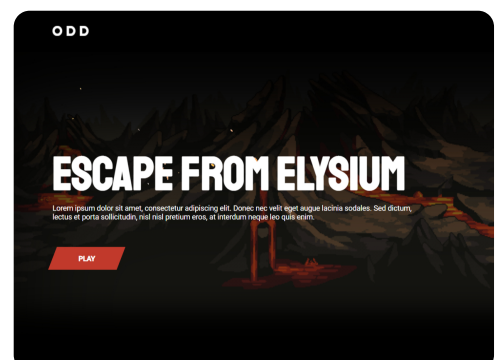

**Code Collabs Challenge Winner** [↗](#)

I entered a coding challenge in which I had to create a coronavirus help program using Javascript. I went a step further to re-create the GOV UK website interface to give it a realer feel. I won the challenge.

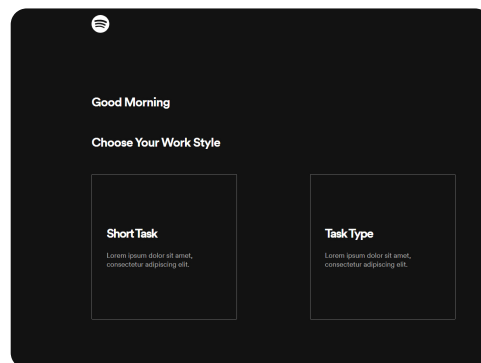

**ODD Studio** [↗](#)

I am currently working on a landing page for a game called 'Escape from Elysium'. I'll be using Google Analytics and Mailchimp for the digital marketing strategy. Technologies: HTML, SASS, Javascript, Google Analytics, Mailchimp

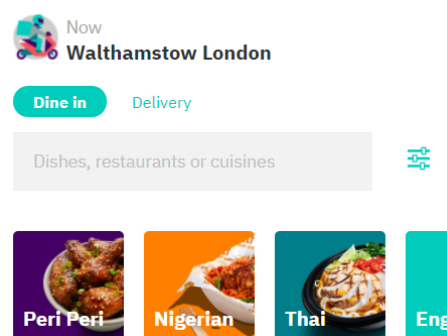

## Spotify Study [Concept] [↗](#)

I am currently working on a Spotify concept called 'Spotify Study'. Users can choose a study mode and connect their Spotify account to play music. Technologies: React JS, SASS

## Deliveroo [Concept]

I started working on a Deliveroo Web app Dine-In concept. With new features such as booking seating, and restaurant information such as 'Long Queue'. Technologies: React JS, SASS.

## More about me

### In my next job it's important that...

I'm in a comfortable environment where I am able to grow and learn. I am passionate about this field of work and I'd love for my skills to be nurtured which will allow me to create amazing work.

### The coolest side project I've built is...

A skincare app for 'The Ordinary'. The user chose information about their skin and the algorithm chose the best products for them.

### In 3-5 years I want to be...

Extremely confident in my skills, creating amazing and innovative products.

### Interests

Coding, Acting, Dancing, Singing, Gym.
